Profile Summary

B.Tech AIML student with experience in developing machine learning and database-driven projects. Familiar with Python, SQL, and web technologies through academic projects and internship experience, with a strong interest in software development and AI.

Education

Noida Institute of Engineering and Technology (NIET)

Aug 2023 – Present

B.Tech in Artificial Intelligence & Machine Learning

CGPA: 9.01/10.0

Royal Oak International School, Gurgaon

2022 Class XII (85.8%)

SVP School, Gurgaon

2020 Class X (85.8%)

Technical Skills

- **Languages:** Python, C, C++, Java
- **Web Technologies:** HTML, CSS, JavaScript
- **AI/ML:** Machine Learning, Deep Learning, CNNs, TensorFlow
- **Databases:** MySQL, SQL
- **Core Subjects:** DBMS, OOP, DSA
- **Tools:** Git, GitHub, VS Code

Experience

Python Programming Intern

Aug 2025 Vault of Codes (Virtual)

- Completed Python assignments focused on programming fundamentals and algorithms.
- Worked on Python-based applications to strengthen programming and problem-solving skills.

Projects

Emotion-Based Music Recommendation System

Python, OpenCV

- Developed an emotion-based music recommendation system using OpenCV and real-time webcam input.
- Used MediaPipe and a Dense Neural Network to detect emotions and recommend songs.

Blogging Platform

PHP, MySQL

- Developed a blogging platform supporting CRUD operations for blog management.
- Connected MySQL using PDO and built a responsive interface with Bootstrap 5.

Movie Database Viewer System

Flask, MySQL

- Developed a movie database application using Flask and MySQL.
- Integrated TMDb API and implemented search functionality with movie poster display.

Plant Disease Detection

TensorFlow, CNN

- Developed a plant disease detection system using TensorFlow and a custom CNN architecture.
- Trained the model on the PlantVillage dataset to classify plant leaf images across 38 categories.

Certifications

- Building Machine Learning Systems with TensorFlow – Infosys Springboard (2024)
- Deep Learning for Developers – Infosys Springboard (2025)
- Python Programming – Vault of Codes (2025)
